

# HUB™

**BRAND HOLD UP BUTTONS**

# Wireless Hold Up Buttons

Now! The HUB series hold up buttons you have come to rely on and prefer are available in both 300 and 900 MHz wireless. We still use the same high standard of components and take the extra time to hand-assemble the units in the USA to assure reliability, but now you won't have to run all those troublesome wires.

**900 MHz HUBs -**  
Supervised Long  
Range

**300MHz HUBs-**  
Standard Range

**The New HUB™ Brand Wireless Hold Up Buttons with built in transmitters can be mounted anywhere and immediately send signal to the Wireless Receiver to activate Alarm Panel or Control with 1 to 16 zone Receivers Each zone can accommodate up to 10 Wireless Hold Up Buttons. Local Receivers Activate Horn Alert with 1 to 40 Zones and 400 Wireless Hold Up Button Capacity. Wireless Hubs are available in Momentary and Latching and run on long life Lithium Batteries.**

**No Wires! Operate Alarms,  
Signal Devices, Controls,  
Door Latches, Equipment,  
Machinery, Hazardous Areas, Etc...**

**Long Life, 10+ year  
Lithium Battery**

**Low Transmitter Battery Indication  
with most USP Receivers.**

HUB™ Brand Wireless Hub's include same proven technology of wired HUB's to prevent false alarms and the same reliability you and your customers have come to trust.

**HUB™ Brand Wireless Receivers - Alarm Monitoring and Models.**  
1-16 zones, Up to 10 HUB's per zone.

**HUB™ Brand Local Monitor Receivers with Alert Notification -**  
1-40 zones, up to 10 HUB's per zone.

## WIRELESS HOLD UP BUTTONS

### HUB™ SERIES WIRELESS HUBS - TRANSMITTERS

**HUB-W1L** - 300MHz Latching push-button transmitter  
**HUB-W2M** - 900MHz Momentary push-button transmitter  
**HUB-W2L** - 900MHz Latching push-button transmitter

### WIRELESS HUB RECEIVERS

#### HUB™ SERIES GENERAL PURPOSE RECEIVER – 300MHZ

**HUB-W1R**  
300MHz 1 Channel Receiver monitors up to 10 identically coded transmitters relay output.

#### HUB™ SERIES LOCAL ALERT RECEIVERS - 900MHZ

**WR-900-1**  
900MHz 1 Channel Receiver monitors up to 10 identically coded transmitters. Audio monitoring of alarm, low battery, and missing transmitter conditions, relay output.

**HUB-W900R-40**  
900MHz Receiver, 40 Channel monitors up to 40 transmitters. monitors alarm, missing transmitter, and low battery conditions, LCD Information readout, relay output.

#### HUB™ SERIES AUTO VOICE DIALER RECEIVERS - 900 MHZ

**ERU-900NP**  
900MHz Single channel Supervised Receiver - Auto Voice Dialer monitors up to 10 identically coded transmitters. Monitors low battery, missing transmitter, aux output.

**AD-900**  
900MHz Single Channel Receiver, 4 Channel Auto Voice Dialer

#### HUB™ SERIES ALARM PANEL - SYSTEM RECEIVERS - 900MHZ

**HUB-W2R**  
900MHz Single Channel Receiver; Supervised, low transmitter battery, missing transmitter, up to 10 identically coded transmitters LEDs indicate a low battery, alarm, or a missing (inoperative) transmitter, until reset.

**WR-900-4**  
900MHz Receiver; 4 Channel, monitors up to 4 transmitters, 4 relay outputs. Provides alarm, low battery, and missing transmitter conditions.

**WR-900-16**  
900MHz Receiver; 16 Channel, monitors up to 16 transmitters. 4-relay outputs. Each output can be programmed to monitor alarm, low battery, and missing transmitter conditions, identifies transmitter fault via a 7-segment display.

**CUT THE WIRES!**

**BATTERY OPERATED  
& WIRELESS**
