PF2-EC

2 Channel Auto Dialer with Power Failure Notification

The PF2-EC dialer features busy-line and no-answer detection to ensure prompt transmission of prerecorded message delivered to as many as 4 standard telephones, cellular phones, voice and/or numeric pagers. Messages to both local and long-distance calls can be transmitted.

When activated, the dialer instantly begins calling the numbers in sequence, delivering each message 1 to 3 times in a row, in accordance with the preselected number of dialing attempts.

.Installation and hookup are quick and easy, whether installed in conjunction with normally open, normally closed dry contact or voltage activation sensors. The unit can also function as a stand-alone device, by simple connection to an ordinary telephone jack.

Applications

- Security/burglar/fire alarm notification
- Equipment malfunction notification
- Environmental warning notification

Features

- Dialer calls 4 telephones, cell phones, or pagers.
- Five (5) optional settings for when notifications of a power loss occurs: Instantaneous, 15 minutes, 2 hours, 12 hours, or 24 hours.
- One channel for power loss sensing,, one hardwired channel for additional input.
- Dialer Senses loss of power and based on setting, will notify parties of loss condition only when specified time has elapsed.
- If power restores before set time has elapsed no call will be made.
- Package includes battery backup and transformer.
